Applications are invited for an experienced Consultant Neurophysiologist, to join our Neurophysiology department at Alder Hey Children's Hospital in Liverpool, UK. Alder Hey is one of only four nationally commissioned centres in England to undertake paediatric epilepsy surgery.

This post will act as lead Neurophysiologist role at Alder Hey for the Northern Children's Epilepsy Surgery Service (NorCESS). The successful candidate would be expected to provide high-quality Neurophysiology services as part of the nationally commissioned network between Alder Hey Children's Hospital and the Royal Manchester Children's Hospital and would work closely with all clinical colleagues that make up the NorCESS service.

The Northern Children's Epilepsy Surgery Centre (NorCESS) provides epilepsy surgery for children in the North of England, Northern Ireland and North Wales and is an established network service between Alder Hey Children's and Royal Manchester Children's Hospital's

This network was commissioned in 2012 and is working towards a goal of providing 70 -100 surgical cases a year, supported by increased provision of specialist pre and peri surgical evaluations.

NorCESS is a multidisciplinary service provided by paediatric consultants in Neurophysiology, Neurology, Neurosurgery, Radiology, Psychiatry and Psychology, supported by Clinical Physiologists and Epilepsy Specialist Nurses.

The Neurophysiology team at Alder Hey consists of 1 WTE Consultant Neurophysiologist, a service manager and 6 physiologists. We work with a range of teams including neurology, neurosurgery, ICU and general paediatrics, both for Alder Hey, Merseyside and the surrounding areas. Aside from supporting NorCESS, we provide a range of EEG activity, Video Telemetry for diagnostic purposes along with Ambulatory EEG with video. We also provide an EMG service along with Neurophysiology Intraoperative monitoring in Selective Dorsal Rhizotomy and tumor resective surgery.

The post holder will provide a small amount of support to the existing Consultant Neurophysiologist in addition to fully supporting the NorCESS work.
