

Santé Québec Mauricie-et-Centre-du-Québec – Universitaire

Juillet 2026

**Call for applications - Neurosurgery position
at Santé Québec Mauricie-et-Centre-du-Québec – Universitaire**

The neurosurgery service of Santé Québec Mauricie-et-Centre-du-Québec – Universitaire announces the vacancy of a neurosurgery position at the Centre Hospitalier Affilié Universitaire Régional de Trois-Rivières. The applicant will join a team of three staff neurosurgeons providing neurosurgical care to a mostly francophone population of approximately 530 000 people.

The neurosurgeon will be called upon to manage a wide variety of neurosurgical pathologies (spine, oncology, trauma, vascular, peripheral nerve) in the context of a general neurosurgical practice in a tertiary trauma hospital and academic center (Campus Mauricie of the Université de Montréal). Research collaborations with Université de Montréal and Université du Québec à Trois-Rivières are encouraged. An interest in spine surgery would be an asset.

For further information, please contact:

Cathy Gendron

Chief of neurosurgery, Santé Québec Mauricie-et-Centre-du-Québec – Universitaire
Associate professor, division of neurosurgery, Université de Montréal
