2027 CSCN EEG Examination
Candidate Pledge of Confidentiality

I acknowledge that, as an examination candidate of The Canadian Society of Clinical Neurophysiology, I have access to examination content and information that must remain confidential. I hereby agree to protect the confidentiality of the examination content, and any discussion related to examination content **before**, **during**, and **after** the examinations.

Notably, this also includes strictly refraining from any verbal discussion of examination material with other candidates at any time **during** the examinations, including at (but not limited to) rest stations, sequestration locations, or food and nutrition break locations.

In the course of examination, I understand that I will come into contact with electronic equipment used for examination purposes. I shall **not** access any other electronic application aside from that strictly required for EEG review.

I understand that candidates are **not** under any circumstances permitted to use or have in their possession any other electronic, recording, and/or communication devices (e.g., cell phone, pager, tablet, camera, smartwatch) from the time of initial registration until the time they sign-out at the end of the examination day. I am aware that any candidate caught using, or in the possession of these unsanctioned electronic, recording, and/or communication devices at any time during the examination day will be expelled.

I am aware that there is no expiration date to this Agreement.

I understand and acknowledge that violation of this Agreement may result in failure of my examination, expulsion from the examination, repeal of CSCN certification, and/or other penalties.
